

# The Science Behind ULTIMATE REVITALIZING CREAM™

ULTIMATE REVITALIZING CREAM combines the best of nature and science to give you an incredibly effective moisturizer that will help you turn back the clock on the aging process.

This patented and expertly formulated product comes to us from skin care scientists in Korea—home to the highest quality skin care in the world. After discovering and patenting a process for stabilizing growth factors, scientists combined this breakthrough with the most powerful ingredients available to create **Synchronized Peptide Complex™**. Our Synchronized Peptide Complex in the Cream is a combination of bioidentical, stabilized growth factors and the powerful antioxidant, superoxide dismutase, for nourishing protection.

Epidermal Growth Factor (EGF) and Fibroblast Growth Factor (bFGF) are the most widely used growth factors for regenerating the skin's health and complexion. It is the job of these proteins to help rejuvenate and repair our skin by promoting healthy skin cell production. As we age, our production declines and this contributes to the signs of aging. Thanks to modern technology, it is now possible to create the identical amino acid sequence found in our own natural Epidermal Growth Factor so the benefits of this compound can be achieved long after our natural production wanes.

## ...restore the skin's natural moisture balance.

This deeply moisturizing cream contains natural oils that help protect from the aging and redness associated with dry, dehydrated skin. Your skin will be nourished with castor seed oil, which helps restore the skin's natural moisture balance.

Along with powerful skin revitalizing compounds, ULTIMATE REVITALIZING CREAM also includes macadamia oil, avocado oil and beeswax for a luxurious and deeply moisturizing cream that restores a bright, youthful complexion.

ULTIMATE REVITALIZING CREAM expertly combined the natural oils that moisturize our skin with growth factors to help it repair and revitalize all day and night. Consistent use will help reduce the appearance of fine lines and wrinkles, brighten the complexion and hydrate the skin deeply for a smooth, supple look. Add it to your skin care routine after you apply AGE-DEFYING INTENSIVE REPAIR SERUM™ for the younger, healthier looking skin you deserve.

## The Importance of Growth Factors

Growth Factors are proteins that support the growth of healthy skin cells and help rejuvenate and repair our skin. As we age, production of our growth factors declines and this contributes to the signs of aging; however, growth factors in topical products are highly unstable. Our patented, stabilized growth factors remain potent for over a year unlike typical growth factor products which deteriorate rapidly within weeks.
