

# ULTIMATE REVITALIZING CREAM™

with Synchronized Peptide Complex™

## Help illuminate and firm your skin with our revolutionary new face cream.

The Ultimate Revitalizing Cream™ will help reduce the appearance of fine lines and wrinkles. This luxurious cream helps the skin retain moisture and improve skin texture for firm and radiant-looking skin. Our Synchronized Peptide Complex™ has been stabilized through a patented process to deliver unparalleled results.

The Ultimate Revitalizing Cream has anti-aging ingredients to promote the skin's elasticity and give it a radiant, luminescent look.

- Patented stabilization technology, Synchronized Peptide Complex™, makes this product the most potent way to deliver the peptides and growth factors your skin needs to turn back the clock on the aging process.
- Soften fine lines and decrease the appearance of wrinkles by energizing the skin's surface with Niacinamide and Adenosine.
- Derived from coconut oil, glycerin is considered an excellent emollient and skin-replenishing ingredient. Its mix of fatty acids can be used to replenish your skin's surface and resist moisture loss.
- Dimethicone is a safe skincare ingredient that calms irritation, minimizes redness, and protects the skin from further damage.

The liposome technology within the Synchronized Peptide Complex provides an effective skin delivery system for these ingredients. The naturally-derived lecithin maintains the stability of peptides to deliver core ingredients deep into the skin.
