

Optimal Probiotic 8™

Optimal Probiotic 8™ combines a patented strain with lab-tested strains of beneficial bacteria in a blend specifically designed to help you create a healthy microbiome.

Probiotics are live microorganisms that support our health in countless ways. We have trillions of good bacteria living inside our body, but we must support this microscopic ecosystem to ensure that the beneficial bacteria outweigh the bacteria that could threaten our health. Optimal Probiotic 8 has been expertly formulated to help you achieve and maintain a healthy microbiome.

There are 8 probiotic strains found in Optimal Probiotic 8, plus prebiotics and postbiotics. Prebiotics are specific carbohydrates that act as food for the good bacteria, helping them grow and multiply. Postbiotics are metabolites created by probiotic bacteria that help to restore the integrity of our gut lining and enhance the effectiveness of the good bacteria in the product. Postbiotics also aid in our body's inflammatory balance.

Optimal Probiotic 8 has been tested and proven to survive the harsh environment of the digestive tract so that all 23 billion colony forming units (CFU) arrive alive. With this proven product, you will know that your health is benefiting from powerful strains of probiotics.

It has been used in a clinical setting by PhD researchers in Taiwan and has been demonstrated through before and after microbiome testing to improve gut health.

Directions: Take 1 capsule daily with an 8 oz glass of water. Store in a cool, dry place.

Supplement Facts

30 Servings per Container
Serving size: 1capsule

	Amount per Serving	% Daily Value
Proprietary Blend	1477 mg (23 billion CFU)*	†
Lactobacillus plantarum GKM3		†
