

The Science Behind AGE-DEFYING INTENSIVE REPAIR SERUM™ with Synchronized Peptide Complex™

AGE-DEFYING INTENSIVE REPAIR SERUM combines the best of nature and science to give you an incredibly effective product that will help you turn back the clock on the aging process.

This patented and expertly formulated product comes to us from skin care scientists in Korea—home to the highest quality skin care in the world. After discovering and patenting a process for stabilizing growth factors, scientists combined this breakthrough with the most powerful ingredients available to create our **Synchronized Peptide Complex**. Our Synchronized Peptide Complex is a combination of bioidentical, stabilized growth factors and research-backed peptides.

Growth Factors and peptides help us defy the signs of aging because they support the integrity of our skin. The proteins collagen, elastin and keratin create the structure of our skin, but when they are damaged, this leads to the signs of aging such as wrinkles, fine lines, loss of elasticity, and dryness. Topical peptides promote a brighter, more radiant complexion and help to even the skin tone.

...proven to reduce the appearance
of fine lines and wrinkles...

This patented serum also contains **Hyaluronic Acid Complex** which helps form a moisture barrier on the skin to protect it from dryness and aging. This unique complex includes hyaluronic acid and levan. Levan is a fermentation extract from sugar cane that helps to boost skin hydration and sooth minor irritations. Increasing moisture helps strengthen and tighten the skin, smoothing out the appearance of fine lines and wrinkles.

In addition to repairing the skin at its core, this serum also harnesses the benefits of amino acids such as glutamine, which helps promote a smooth, radiant complexion. Antioxidants including glutathione and Vitamin C help protect the skin from damage while Collagen helps prevent sagging skin and promotes a more youthful complexion.

AGE-DEFYING INTENSIVE REPAIR SERUM is packed with research-backed ingredients that have been proven to reduce the appearance of fine lines and wrinkles, brighten the complexion and hydrate the skin deeply for a smooth, supple look. Add it to your skin care routine and follow with ULTIMATE REVITALIZING CREAM for the younger, healthier looking skin you deserve.

The Importance of Growth Factors

Growth Factors are proteins that support the growth of healthy skin cells and help rejuvenate and repair our skin. As we age, production of our growth factors declines and this contributes to the signs of aging; however, growth factors in topical products are highly unstable. Our patented, stabilized growth factors remain potent for over a year unlike typical growth factor products which deteriorate rapidly within weeks.
