

## Happy Collagen™

with Triple Peptide Complex

### Anti-aging from the inside out.

Physiologically, you reach your peak at age 25.  
25? Yes, 25. But don't worry, we've got you!

One of the first significant signs of aging is the loss of collagen. Our Triple Peptide Complex may help prevent collagen breakdown, restores collagen synthesis and nourishes all three layers of the skin matrix. The result – smoother, softer, firmer and brighter skin – from the inside out. You'll see!

It's better than anything you've ever tried. Plus, it strengthens bones and lubricates joints. There's a metabolic booster to support weight loss and 5-HTP to naturally elevate two important feel-good hormones: tryptophan and serotonin.

Look younger. Feel better. Be stronger.

We call this great-tasting powder Happy Collagen.  
You might start calling it "25 again."
