

Probio8™

PROBIOTIC DIETARY SUPPLEMENT

Probio8 contains beneficial bacteria in a blend specifically designed to help you support a healthy microbiome.

Probiotics are live microorganisms that support our health in countless ways. We have trillions of good bacteria living inside our body, but we must support this microscopic ecosystem to ensure that the beneficial bacteria outweigh the bacteria that could threaten our health. Probio8 has been expertly formulated to help you achieve and maintain a healthy microbiome.

There are 8 probiotic strains found in Probio8, plus prebiotics and postbiotics. Prebiotics are specific nutrients that act as food for the good bacteria, helping them grow and multiply. Postbiotics are metabolites created by probiotic bacteria that help to restore the integrity of our gut lining and enhance the effectiveness of the good bacteria in the product. Postbiotics also aid in our body's inflammatory balance.

Probio8 has been formulated to survive the harsh environment of the digestive tract so that all 23 billion colony forming units (CFU) arrive alive. With this potent product, you will know that your health is benefiting from powerful strains of probiotics.
